INVESTMENT MANAGEMENT

## INVESTMENT OBJECTIVE

The investment objective of the **Advisory Research All Cap Value Fund** (the "Fund") is to seek long term capital appreciation.

## INVESTMENT OVERVIEW

- Target inefficient parts of the market, seeking companies that have easily understood business models, profitable operations, solid financial positions, and attractive absolute valuations.
- Differentiate our investment discipline through extensive fundamental analysis, a long term perspective, and partnerships with effective management teams.
- Construct portfolios by positioning capital with the best absolute value opportunities, where risk is measured by the potential for permanent loss of capital, and reward is measured by execution of a company specific actions to unlock shareholder value.
- Consider portfolio construction guidelines such as sector and security position limitations as well as liquidity and other material owners, when a buy decision is determined.

The performance data quoted presents past performance and past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information quoted. To obtain performance information current to the most recent month-end, please call (888) 665-1414. A redemption fee of 2.00% will be imposed on redemptions of Fund shares owned less than 90 days. The performance returns reflect a fee waiver in effect and without the fee waiver returns would have been reduced.<sup>†</sup>

WHY INVEST IN THE ADVISORY RESEARCH ALL CAP VALUE FUND?

- **Experience:** The Fund is managed by a team of experienced investment professionals with strong academic and professional profiles.
- **Perspective:** Our long-term investment horizon allows us to think like owners of our companies. We look to hold management teams accountable and will be in active dialogue in order to increase the probability of shareholder returns.
- **Downside Focus:** Our fundamentals-based, bottom-up, active management approach begins with a focus of avoiding permanent loss of investors' capital through our company due diligence. We look for companies with strong financial positions, consistent cash generation, and appropriate capital discipline.
- **Upside Potential:** Once downside risk is properly mitigated, we define and research the company's ability to unlock shareholder value through company specific action plans that will benefit shareholders.

ABOUT ADVISORY RESEARCH INVESTMENT MANAGEMENT

Risk Factors

Mutual funds are subject to risks which may cause investors to lose money. A principal risk of investing in the Fund is equity risk, which is the risk that the value of securities held by the Fund will fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests. The Fund's investments in non-U.S. issuers may involve unique risks compared to investing in securities of U.S. issuers. The Fund's investments in foreign issuers in developing or emerging market countries involve exposure to changes in economic and political factors. Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's Risks.
